**August 7**

## Mechanic and Cardiologist

A mechanic was removing a cylinder-head from the engine of a motorcycle when he spotted a well-known cardiologist in his shop.

The cardiologist was there waiting for the service manager to come take a look at his bike when the mechanic shouted across the garage, "Hey, doc, want to take a look at this?"

The doctor, a bit surprised, walked over to where the mechanic was working on the motorcycle. The mechanic straightened up, wiped his hands on a rag and asked, "So, doc, look at this engine. I open its heart, take the valves out, repair any damage and then put them back in, and when I finish, it works just like new. So how come I make such a small salary and you are paid the big bucks for basically the same work?"

The cardiologist paused, smiled and leaned over, then whispered, "Try doing it with the engine running."
